

CAPE MINING SUPPLIES (PTY)LTD

# *PERFORMANCE PARTS*

## IMPELLERS

Closed and open van impellers are available in 27% chrome, moulded rubber (40 ° shore A hardness) or 60% shore A hardness. All are manufactured to exacting specifications.

## MOULDED LINERS

A wide range of liners and suction bushes are available in moulded rubber or Polyurethane. Both exhibit outstanding resistance to abrasion.

## CHROME VOLUTES

Volutes and suction bushes are cast to high standards. High chrome and hardness specifications result in superior castings with minimum hardness of 600 BHN. In addition to the standard chrome (27%) we also supply "Hyper-chrome" with added Molybdenum for increased toughness and durability. (<750BHN)

## 27% CHROME, CAST IRON & MOULDED RUBBER EXPELLER RINGS

Reduce pump downtime by installing gland components suited to your pumping requirements. Expeller rings are available in moulded rubber, 27% chrome or cast iron.

Stuffing boxes are also available in either cast iron or 27% chrome.

## BEARING HOUSING AND ASSEMBLY

A full range of complete bearing assemblies including labyrinths, locknuts, grease retainers, piston rings and end covers are available.

## 27% CHROME AND CAST IRON EXPELLERS

Expellers manufactured to high standards in 27% chrome reduce costly downtime. Expellers are also available in cast iron.

## GLAND COMPONENTS

Precision shaft sleeves manufactured to DIN specifications in a high grade stainless steel hardened to 55 RC. All gland components are manufactured in stainless steel.

## FASTENERS

A full range of zinc-plated machined bolts and fasteners are available.

Gland bolts and studs are supplied in stainless steel.
